# GET GOING

# GET GALVANIZED

Introducing the Total Gym ELEVATE Series: featuring a sleek matte black finish, fully adjustable bodyweight resistance against gravity, and suitable for all fitness levels.

Available for individual or bundled purchase or as part of a complete ELEVATE Circuit.

Elevate your workout experience with this premier fixture for gyms and facilities, perfect for Group Exercise, Personal Training, and Pilates enthusiasts alike.

## ELEVATE ROW ADJ

Emulates a rowing movement pattern using 7 levels of adjustable bodyweight resistance. Produces a full-body workout, integrating a strength component into a fully adjustable cardio machine.

## ELEVATE PRESS

Introduces a new way to do a shoulder press by placing users in an inverted position. Seven adjustable levels allow users to select a percentage of their own bodyweight as resistance.

## ELEVATE JUMP

Builds explosive power and develops lower body muscle mass with two primary movements, the squat and the squat jump. Uniquely designed to facilitate plyometric exercises, the Jump allows users to accelerate and decelerate quickly during a squat jump in a safe, controlled manner.

# ELEVATE™ EXPERIENCE

The 6-piece commercial gym ELEVATE Circuit package applies the unique concept of incline bodyweight training as the method of resistance, rather than the traditional weighted resistance most fitness equipment is built upon.

ELEVATE equipment empowers people of all fitness levels to modify the difficulty as they move through the circuit to get the type of workout they need.

Before using ELEVATE equipment, users adjust the angle of the rails... the higher the incline, the greater the resistance.

Whether you want to offer cardio, strength or a combination, the ELEVATE line has you covered through incline variation and reps.

	<b>CARDIO // LEVELS 1-3</b> Lower resistance allows for more reps, which means higher intensity.
	<b>SCULPT // LEVELS 3-5</b> Total body conditioning. A mix of cardio + strength.
	<b>STRENGTH // LEVELS 5-7</b> Higher resistance levels focus on building strength.

## ELEVATE CORE ADJ

Strengthens the abdominals while engaging the entire core musculature. Offering unparalleled versatility for an abdominal machine, the Adjustable Core is a plank facilitator that allows for two primary movements, the Dynamic Plank and the SCRUNCH.

## ELEVATE PULL-UP

Utilizes incline bodyweight resistance to assist users in doing a proper pull-up to strengthen the muscles of the upper body. Featuring an adjustable incline with seven levels, the ELEVATE Pull-Up allows users to lift approximately 30 percent to 60 percent of their own bodyweight.

## ELEVATE ENCOMPASS

Encompass is now part of our ELEVATE series and is the award-winning equipment anchor for GRAVITY®, the time-efficient, personal training, group fitness and Pilates program that is generating excitement and new revenue in commercial facilities around the world.

No matter how successful a pre-sale is or how many members our franchisees have at a particular club, whenever I visit, I always see members working out on the Total Gym ELEVATE Circuit."
